+ Curtain

12 - PASSENGER
+ Curtain + Optional Cabinet

SILENS™ IS BEAUTIFUL

By incorporating Diffused Antivibration Multilayer Panel (DAMP) technology into the SILENS™ noise and vibration abatement system, Mecaer introduces an innovative way to experience silence.

DAMP technology bonds a lightweight honeycomb structure to the aircraft panels to further minimize noise and increase comfort in flight while offering compressed time for installation and removal with a minimal weight increase.

MAXIMUM REACH MISSION RANGE

2 Crew + 6 Pax, 6000 ft. ISA +20, 30 Min. Reserve

Mission Range: 560 NM / 1037 km, 280 NM / 518 km Radius (Return to Base)

THE NEW GLOBAL STANDARD

As the first commercially certified fly-by-wire (FBW) helicopter, the Bell 525 is the future of vertical flight.

The system makes flying repeatable, simple and intuitive. With triplex systems, the Bell 525 provides reliability for your pilots and passengers when they're far away from home.
